Why is it crucial for researchers?****■ Biography**

Javier Grávalos is the co-founder and Business Development Director at Insight Gravity. He has extensive R&D experience, with over 20 years in the industrial sector.

He has a proven track record of driving innovation from concept to market and leading R&D teams. Javier has implemented disruptive methodologies to accelerate product development.

He brings expertise across the entire value chain, from laboratory work and pilot plant scaling to industrialization and commercialization. He also has experience in entrepreneurship processes and strategic innovation planning. In his current role at Insight Gravity, he leads strategic initiatives across the value chain, focusing on driving growth and optimizing the launch of new science-based products.
